Original question → query analysis → deterministic metadata filters
Router: fixed benchmark methods and cutoffs
B4 refinement
up to 3 rounds
BM25 lexical retrieval
Dense vector retrieval
Optional document-graph retrieval
RRF fusion → optional reranker → recorded leaf ranking
Context candidate selection → budgeted packing / complete parent expansion
Online sufficiency evaluator: answer, refine, or stop
Generator selects retained source numbers → deterministic citations
Citation identity + quote checks → model support verification
Completed answer or explicit insufficient-evidence / failure outcome
